Position of NTi Audio AG concerning Conflict Materials

NTi Audio AG is a worldwide leading company for the design, production and distribution of Audio and Acoustic Test & Measurement systems. In some of our products, we are using electronic components that may contain Gold, Tantalum, Tin or Tungsten, as each of these metals have specific electrical properties which are necessary to meet the high specifications of our products, and cannot be replaced by other materials.

Due to our firm commitment to a socially responsible supply chain, and by knowing that the aforementioned metals are falling under the class of "Conflict Materials", we hereby confirm that all NTi Audio AG products are "conflict free" according to the EU regulation 2017/821 of 7 May 2020 or the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010.

This statement is based on our own best knowledge, and on the written information provided by our suppliers of components, modules or assembled devices, and will be reviewed regularly.

If you need further information, please contact NTi Audio AG.

A handwritten signature in black ink that reads 'M. Becker'.
